

ADI KIBERTI

My name is Adi Kiberti and I live in Kiryat Bialik, I've been a part of the Leaders of the Future program for three years and I'm in the ninth grade. I'm fourteen years old and the youngest of five siblings. My favorite subjects at school are English and Sports. My hobbies include cooking, baking and computer games. My dream for the future is to obtain a university degree, and work in high-tech or maybe even start my own business!

The program helped expand my perspective of the future, and helped me recognize that I can achieve anything I aspire to if I put forth the effort.

Before I started the program, I didn't dream big, I didn't think about the future or what I wanted to do with my life in the same way I do today. Today, after being in the program for some time, I allow myself to dream and fly with those dreams. Leaders of the future has really elevated my confidence and allowed me to dream big. Since starting the program, I have made many good friends and achieved so much, both academically and socially.

If I was approached by a friend who wanted to know about the program, I would tell them that it would help them with their studies and support them in achieving excellence. We don't just study the materials, we are exposed to different methods of learning and studying that allows us to take our abilities and education to a higher level. The program helped expand my perspective of the future, and helped me recognize that I can achieve anything I aspire to if I put forth the effort. In my opinion, any Ethiopian student who is a high achiever should try and get accepted into this program, they don't have to be a genius, they only need the desire to learn and improve themselves.

The most important thing I learned from the program is- never give up! Even when you face hard times or fail, you should always keep trying and work to correct your mistakes along the way, keep working on improving and the results will come alone.
